

U-10 Size Soccer Field Setup Spreadsheet and Diagram (measuring from mid-line)

Directions: Anchor one measuring tape at midline end (A or B) and layout midfield line using corresponding coordinates. Anchor 2nd tape at other end of midline (A or B). Using both measuring tapes and corresponding color-coded coordinates, mark critical points on one half of field with paint. Leaving measuring tapes anchored in same place repeat for other half of field. (note size of measuring tapes needed by largest distance to be measured. 300 ft. tapes work for all but the largest fields)

U-10 Size Soccer Field Setup Spreadsheet and Diagram (measuring from mid-line)

Remove tapes, using critical points painted, layout string and paint lines using buggy (connect the dots). Layout center circle (24 ft. radius), penalty arc (24 ft. radius from penalty spot), and corner kick arcs (3 ft. radius). Paint penalty spot heavily.
